

RABIES :

- Prevalent disease in Cambodia with domestic and wild animals.
- Mortal disease for animals and humans.
- Vaccination of pets is an easy and effective protection.

HEARTWORMS :

- Mosquito transmitted disease for cats and dogs.
- Mortal, very difficult and risky to cure.
- The only cheap and effective prevention is one injection every three months.

PARASITES :

- Many different species in Cambodia.
- Sometimes transmissible to humans.
- Necessity of an adapted deworming program.
